RESUMEN DEL PROYECTO

Objective: The project ScolaMAR aims to provide skilled graduates, adjusted to the needs of the labour market, for the implementation of Smart coastal management and Sustainable blue growth, therefore increasing employability of Morocco graduates and responding to the challenges posed by the implementation of the 2015 Coastal Act.

Expected results and dissemination: To reach its objectives, the ScolaMAR strategy is to develop an innovative specialized Master program based on the integration of the multidisciplinary dimension of Marine and Coastal Sciences and to train Moroccan trainers in order to reinforce their ability to transfer knowledge to students. The specialized Master degree to be developed will have 6 specializations distributed amongst the Moroccan universities. The future graduates from this Innovative Master program covering all the fundamental aspects of ICZM will be able to actively participate in the sustainable development of their society and global sustainable blue growth on the long-term.

Colaboración del equipo de la UCA (100 palabras, en inglés):

UCA is the leader of the WP5 on Quality Assurance and is deeply involved to ensure an effective evaluation of the activities and their progress. UCA is also involved in all WPs. It actively participates in welcoming the Moroccan staff for job-shadowing activities, conferences and workshops. UCA disseminates the project outcomes in collaboration with the consortium and through its own channels.
