

# Meet Our — Team

Building  
Smart Web  
Apps with AI

# Iván Ruiz-Rube

[ivan.ruiz@uca.es](mailto:ivan.ruiz@uca.es)

PhD in Computer Science from the University of Cádiz (2013), currently serving as an Associate Professor at UCA, specializing in Web Engineering, with a focus on Java, Vaadin, and Spring. His research interests include applying AI to enhance software processes and improve teaching and learning through technology.

He has authored 16 papers in JCR-indexed journals, participated in 15 national and international research projects, and co-supervised doctoral theses. Additionally, he has organized scientific events, published open-access teaching materials, and received awards for teaching and research. Prior to academia, he worked in IT consulting for nearly four years, contributing to public administration projects.

# Andrés Muñoz

[andres.munoz@uca.es](mailto:andres.munoz@uca.es)

PhD in Artificial Intelligence from the University of Murcia (2011), specializing in knowledge-based models for context-aware applications. His work has advanced intelligent systems in Ambient Assisted Living (AAL), smart education, and smart mobility by solving data fusion issues across various sensor sources.

He has led several competitive research projects at national and European levels, supported by international collaborations. Since 2015, he has contributed to conferences, including as General Chair for the IEEE International Conference on Intelligent Environments (2017). He is also an Associate Editor for the Journal of Ambient Intelligent and Smart Environments and has organized workshops and coordinated special journal issues.
