

Join the Blended Intensive Programme

“Sustainable City – a Physical Place or an Abstract Phenomenon?”

Discover how cities of the future are designed, lived, and imagined!

What the programme offers

- Explore the city as a complex social, economic, cultural, and environmental system.
- Learn about urban sustainability, green mobility, and the role of public spaces and greenery.
- Work in international, interdisciplinary teams using innovative, project-based learning methods.
- Participate in interactive workshops, design sessions, and field research.
- Develop key competences for the future: communication, teamwork, creativity, and critical thinking.
- Gain 3 ECTS credits and valuable international experience!

Programme schedule

- Virtual mobility: 19–24 April 2026 (online sessions)
- Physical mobility: 18–22 May 2026 (University of Gdańsk,

How to apply
